

Develop a Mobile Application

| | |
|--------------|-------------------------------------|
| Team ID | PNT2022TMID20456 |
| Project Name | Project – IOT ENABLED SMART FARMING |

Objective:

To develop a mobile application to send the temperature, humidity, soil moisture values to the mobile app which was developed using MIT App Inventor and to turn on or off the motor in the field using the mobile app

```

Published Temperature = 90 C Humidity:21 soil moisture:34

```

The screenshot displays the MIT App Inventor web application. At the top, there's a navigation bar with links for 'Service Desk', 'IBM Watson', 'IBM App Dev', 'Node-RED', 'MIT App Inventor', 'Node-RED', and a '+' icon. Below this is a breadcrumb trail: 'Not secure | http://ai2.appinventor.mit.edu/#5721328091791360'. The main interface is divided into three sections:

- Left Sidebar:** Contains a 'Blocks' palette with categories like 'Built-in' (Control, Logic, Math, Text, Lists, Dictionaries, Colors, Variables, Procedures), 'Screen1', and 'HorizontalArrangement'. Below the palette are 'Rename' and 'Delete' buttons. At the bottom is a 'Media' section with an 'Upload File' button.
- Top Bar:** Shows the app name 'iotapp' and buttons for 'Screen1', 'Add Screen...', 'Remove Screen', and 'Publish to Gallery'. On the right are 'Designer' and 'Blocks' tabs.
- Viewer Area:** Displays a block-based program. The logic includes:
 - A 'when Green flag clicked' event block.
 - A 'when Screen1 clicked' event block.
 - A 'when Screen2 clicked' event block.
 - A 'when Screen3 clicked' event block.
 - Various 'set' and 'get' blocks for variables like 'screenCode', 'screenType', 'screenName', and 'screenColor'.
 - 'API call' blocks for 'getScreenCode' and 'getScreenType'.
 - 'Join Text' blocks for concatenating strings.
 - 'Show Warnings' dialog box at the bottom center.

The screenshot displays the Node-RED web interface in a browser. The top navigation bar includes the Node-RED logo and a 'Deploy' button. The browser's address bar shows the URL 'http://169.51.194.85:31069/'.

The interface is divided into three main sections:

- Left Sidebar (Dashboard):** Contains a 'dashboard' tab with several widgets: 'button', 'dropdown', 'switch', 'slider', 'numeric', and 'text input'.
- Main Workspace (Flow 1):** Displays a flow diagram with the following nodes:
 - IBM IoT:** A blue node with a 'connected' status.
 - get/sensor:** A yellow node that triggers a function block.
 - get/control:** A yellow node that triggers a function block.
 - inject:** A blue node that triggers a function block.
 - msg.payload:** A green node that outputs the payload.
- Right Sidebar (Debug Console):** Shows the 'debug' tab with logs for the 'msg.payload' object. The logs include:
 - 11/8/2022, 11:25:41 PM: node: 02f649a 0d0d98
